

Mother

You are Kathie's mom. She's your whole life. She's your only child. You would do anything for her.

Episode 1: Kathie

Scene 1: The Birthday Party

Kathie is celebrating her 16th birthday. Her friends came and everybody is having a great time. You're making dessert, which you will serve right after Kathie's friends finish their congratulations and give her their presents.

Ignore any mentions of Eve.

Scene 5: Back at Home

You are coming home after your doctor's appointment with Kathie. You're desperate. You thought that this "Eve" was just some kind of hold over from her childhood, an imaginary friend. But it seems that's not the case. Kathie is suffering from a very serious psychiatric disorder. She'll have to take a strong medication and maybe they'll want to put her into an institution in the end. You're scared to think about that. Scared of the future.

Don't say anything. You don't talk in this scene. Communicate through body language, looks and glances... you could even move your mouth as though you want to say something, but don't say anything.

Episode 2: Eve

Scene 1: Back at Home

You are coming home from the doctor with Eve. You are desperate. Your only daughter, Eve, is suffering from a serious mental disorder and she will

have to take strong medication. Maybe they will have to put her to some institution in the end. You are scared to think about that. Scared of the future.
You can speak in this scene

Scene 5: Visiting hours

You met up with Eve's friends Peter, Alice and Andrew in front of the clinic ward. Everybody brought her something. You feel you are going to break down any minute. You can't take it anymore. You don't think you are able to support her any longer. You don't want to see your only daughter in such a desolate state. She lives in her own world now anyway. Maybe she doesn't even recognize you. And maybe it will be better that way. For all of you. Maybe coming here wasn't such a good idea after all. It's cruel to have this kind of thoughts, but you can't make them go away. Maybe her friends will give you strength.
